

# Kalmar Heavy Forklifts Big challenges made easy

## The Kalmar DCG250-12 and DCG330-12 built in Shanghai

From April 2025 the Kalmar Heavy Forklift Trucks, the DCG250-12 (25 tonne at 1200 mm load centre capacity) and the DCG330-12 (33 tonne at 1200 mm load centre), will be manufactured at our plant in Shanghai. Shortening delivery times and lowering freight costs, together with very competitive prices for regional deliveries.

## Built to last

Kalmar designed and built its first heavy lifting forklift over 80 years ago and have now delivered over 100,000 machines to its customers around the world. Known for producing robust, reliable, and highly efficient forklifts these heavy lifting machines manufactured in Shanghai will be no different. You can expect the same great quality, excellent ergonomics, many safety features fitted as standard and excellent residual values. It's the same great forklift, just now available from our Shanghai facility. We will also continue to build our full range of forklifts at our European manufacturing unit in Stargard, Poland.

## Power and durability for heavy duty applications

Our heavy lift trucks are engineered to provide exceptional strength and reliability, ensuring a smooth and secure operation even when handling heavy loads. From the metal industry to concrete and heavy industry, from logistics and stevedoring to rail and railroad cargo handling, our heavy forklifts excel in various demanding applications and deliver the reliability and safety you need.

### ORDER NOW

Kalmar will start producing its Heavy Forklift Trucks the DCG250-12 and the DCG330-12 at its manufacturing and assembly facility in Shanghai. You can expect shorter delivery times and depending on your location, cheaper freight cost with no import duties to some countries. Sales start October 2024, reserve yours now.
